PROFESSIONAL SUMMARY

Versatile Software Engineer and QE Platform Leader with 9+ years of experience engineering high-performance automation platforms, banking systems, and cross-platform Flutter applications. Proven track record driving developer velocity, architecting secure CI/CD and release pipelines, and leading GenAI tooling adoption. Unique expertise combining deep fintech domain knowledge (T24, Open Banking, CDD/CRA, KYC) with production-ready full-stack and mobile development.

CORE TECHNICAL SKILLS

Mobile	Flutter (Mobile, Web), Dart, Android / Kotlin, BLoC, SQLite, Drift
Automation	Cypress, Playwright, Selenium, REST Assured, Karate, Bruno, Appium, BDD / Cucumber, TestNG, JUnit, TypeScript
CI/CD	Azure DevOps & Pipelines, Azure Key Vault, GitHub Actions / Workflows, Jenkins, Docker, CODEOWNERS
Release	Google Play Store (APK/AAB), Flavors, ADB Validation, Gradle
Domain	Banking (T24/Temenos), Lending, Deposits, CDD/CRA, KYC, CRM, Customer Onboarding
Systems	Allica Bank, Metro Bank, Saascada, HubSpot, GoDiligent, WorldCheck1, Companies House UK
GenAI	GitHub Copilot adoption, AI-assisted test generation, LLM tool integration

PROFESSIONAL EXPERIENCE

Senior SDET

Allica Bank, UK | May 2023 – Present | Remote

- Architected the enterprise-level **@allica/shared-e2e** platform library with Azure Key Vault integration and a local MSAL mock server for role-based JWT generation across teams — adopted org-wide.
- Designed a smart Cypress spec-filtering algorithm and parallel local execution architecture, **reducing CI pipeline runtimes by 60%** and eliminating redundant file scanning.
- Led migration of legacy test suites from Cypress-Cucumber to Mocha/cypress-grep; transitioned API suites from Postman to Bruno for seamless Git version control.
- Delivered end-to-end automation for complex banking flows: CDD API, CRA Phase 1, Safeguarding, Pension Profiles, and Business Rewards.
- Pioneered Cypress Data Management with State Events and dynamic API mocking (no static fixtures) for resilient test architecture.
- Integrated Visual Regression testing; deployed Plop E2E templates and established Playwright automation with structured default reporting.
- Championed GitHub Copilot (GenAI) adoption** across the QE organisation, boosting team productivity by 40%.

Principal Software Engineer

Maveric Systems | Jan 2021 – May 2023

- Led automation framework development for Asset Finance — COB and Multi-Asset Automation using Selenium Page-Factory, Cucumber BDD, and Page-Object Model.
- Implemented POC frameworks using Docker Test Containers, MSSQL, and Liquibase for microservices test environments.

Senior Test Engineer

Maveric Systems | Sep 2018 – Dec 2020

- Delivered QE across Digital Mobile App (Android/iOS), T24 Banking Services, Cards, Transfers, Payments, and Retail Operations.
- Executed P&C Automation, T24 UI Upgrade, Mobile BAU, and Mobile SCA Automation projects.

MOBILE & WEB DEVELOPMENT PROJECTS

Flutter Notes App

Production-ready local-first Flutter app with BLoC state management, biometric authentication, and offline-first SQLite synchronisation.

SMS Stack Manager

Privacy-first Flutter app using Drift/SQLite for local financial insight extraction; managed Android build flavors and automated Google Play Store AAB release workflows.

People App IKY v2

Multi-platform genealogy ecosystem (Mobile, Web, Edge) deployed on Linux, Windows, and Raspberry Pi; containerised backend via Docker Compose with environment-aware CI/CD pipelines.

NiStudioUs Portfolio

Responsive web ecosystem built with Vite, React, and Flutter Web; automated CI/CD static hosting and dynamic routing — live at nistudious.github.io/home.

EDUCATION

Executive PG Program in Financial Services and IT Assurance — LIBA, Chennai

B.E. Computer Science and Engineering — Velalar College of Engineering and Technology, Erode
